

I do not see the necessity to change this rule. It is only being promoted by the broadcast industry. The industry is intentionally not broadcasting any information about the proposed change in order to limit debate. One of the fundamental rights of Americans is freedom of speech and the press. Allowing the power of the press to be concentrated to fewer individuals impacts upon that freedom. As can be seen from the lack of publicity and debate on this subject, the broadcasters already have the power to limit freedom of our press and our ability to speak out. Please reject this change that is based solely on a profit motive.
